THE FALLOUT FROM BULLYING IN OHIO AND NATIONWIDE

The effects of bullying are serious and can dramatically affect a young person's sense of safety and self-worth. Here are some statistics that illustrate the problem in Ohio and around the nation.

1 IN 3

bullied students reported being bullied repeatedly. (at least once or twice a month during the school year).

1 IN 5

More than 1 out of 5 (20.8%) students report being bullied.

Only about **20-30%** percent of students who are bullied notify adults.

THE TRAGIC CONNECTION BETWEEN BULLYING AND YOUTH

SUICIDE

2x

A victim of bullying is twice as likely to take his or her own life.

In 2017 Ohio saw

SUICIDES of young Ohioans.

That's the highest annual suicide rate in the past decade.
