

Project ECHO

A virtual learning community for primary care providers

Project ECHO (Extension for Community Healthcare Outcomes) is a unique, virtual learning community for primary care providers who care for pediatric patients. The goal is to help participants master best practices for common conditions that can become complex. Cohorts are available free of charge.

FOR MORE INFORMATION

For schedules, registration, continuing education, and more information visit our web page at: www.cincinnatichildrens.org/projectecho

WHAT IS THE COHORT FORMAT?

Each course is offered via video conferencing for 20 – 25 participants. Sessions last for about an hour and include a live lecture, case presentation, discussion and time for questions. The didactics, presented by Cincinnati Children's specialists, provide seeds of content knowledge. But the discussions are the richest part of learning, with opportunities to follow cases over time and interact with other participants in meaningful ways.

WHO CAN TAKE THESE COURSES?

Primary care physicians, advanced practice nurses and physician assistants. Continuing education credit is available.

WHAT COURSES ARE AVAILABLE?

For 2021, we anticipate having the following courses. For the most up-to-date information, please visit www.cincinnatichildrens.org/projectecho

- **Depression** — will meet twice a month for four months
- **Anxiety** — will meet twice a month for four months
- **Behavioral Health** — will meet twice a month. Designed for non-prescribing mental health practitioners. Topics to be determined.
- **Graduate Series** — will meet twice a month, ongoing. Designed for those who have completed the mental health courses.

“The course gave me insights into things I might change in caring for patients with depression, and a greater comfort level with certain approaches and medical management. The training I received could allow me to make fewer referrals for specialty care, which means patients will receive the treatment they need more quickly.”

— Paul Korn, MD, pediatrician
Mason, Ohio
