

The true power of social media is influence. Social media provides an avenue for Ohio AAP members to not only engage with their patients and followers, but to also influence them with the right content that helps them make an informed decision.

Now more than ever, it is critical to connect and engage families on their healthcare and in their medical home. Pediatric providers are using social media to communicate with families, connect and share information.

Because social networks feed off interactions among people, they become more powerful as they grow. And this is where you come in; Ohio AAP is asking our membership to follow us on all social media platforms. Please feel free to pass this along to your colleagues, friends and family as well. We appreciate your ongoing dedication to promote the health, safety and well-being of Ohio's children and adolescents so that they may reach their full potential.
